- Tabs → switch between Viral / Affiliate Studios
- Card → output blocks, viral score, trend data
- Input, Select, Textarea → prompt input
- Progress → visualize Viral Score breakdown
- Tooltip → hover hints on score metrics
- Button → primary action = Generate

WUX Flow

- 1. **User lands** → sees Trending Topic suggestion card (optional).
- 2. **User enters idea** or selects template.
- 3. Clicks "Generate" → loading shimmer → outputs appear.
- 4. Viral Score Breakdown appears dynamically below.
- 5. Outputs displayed in cards → user can copy/share or click into details.
- 6. **Upgrade CTA** appears subtly below every 3rd card (for free users).

Would you like me to generate the **Affiliate Content Studio** version next (with product cards, pricing sections, and affiliate tags)?
