Info + Tip Section

💡 "Trends auto-refresh daily at 5 AM ET."
[View History] (small link)
```

```
Sticky Bottom CTA

[⚡ Go to Viral Studio →] (large full-width button)
```

🪶 *Mobile Design Considerations*

- **Single-column layout:** All grids become vertical stacks for easy thumb scrolling.
- **Sticky CTA:** Keeps conversion visible as users browse.
- **Horizontal scroll for tabs and trending picks:** Improves discoverability without clutter.
- **Reduced text:** Summaries trimmed to 1–2 lines max.
- **Touch targets:** Buttons min h-12, rounded-xl.

🧩 *Key Responsive Components (Shadcn/UI)*

- Sheet → slide-in menu
- Tabs → horizontal scroll variant
- Card → single-column, full-width
- Carousel → for product picks
- Button → sticky footer CTA

🧠 UX Flow

1. **User opens dashboard on mobile** → sees top trend + filters collapsed.
2. **Swipes through tabs or scrolls down** to explore content.
3. **Taps "Generate"** → navigates to Viral Studio with selected context.
4. **Sticky footer CTA** constantly offers quick access to generation tools.
